

PureCharge

The Sinergex PureCharge series are fully automatic and intelligent battery chargers. Using microprocessor and switch-mode technology, the PureCharge battery chargers carefully assess the battery and then deliver the optimum charge required.

Being a true 3-stage battery charger, the PureCharge delivers charges in bulk, absorption and float stages, each stage delivering the optimum charge for the best performance and power for your battery. By incorporating the float charge stage, the PureCharge battery charger allows you to set and forget, while your batteries are automatically maintained.

By implementing the latest technology, PureCharge battery chargers are extremely light in weight and very compact in size and can be used and installed almost anywhere.
